

Murhaf Ghziel

Full-Stack Developer — React, Next.js, TypeScript, AI Integration

Riyadh, Saudi Arabia · +966 50 714 9775 · ghzielmorhaf@gmail.com
murhaf.site · linkedin.com/in/morhaf-ghziel-a720a72b9 · github.com/MorhafGhziel
Arabic — Native · English — Professional

PROFESSIONAL SUMMARY

Full-Stack Developer shipping production web applications since 2024. Builds React and Next.js interfaces backed by real systems — REST APIs, PostgreSQL, auth and payments — and ships LLM-backed products with multi-provider fallback and cost control. Led a frontend team of 3 at INNO and delivered 7 paid client builds solo.

TECHNICAL SKILLS

Languages and Frontend · TypeScript, JavaScript, HTML5, CSS3, React, Next.js (App Router, Server Actions), Tailwind CSS, Framer Motion, GSAP, Canvas, Accessibility (WCAG AA), RTL / Arabic layout

Backend and Data · Node.js, Express, REST APIs, SQL, PostgreSQL, Supabase, MongoDB, Prisma, Zod, NextAuth, JWT, OAuth 2.0

AI and LLM · Gemini, Groq, LLM API integration, prompt engineering, structured JSON output, streaming, multi-provider fallback, token budgets

AI-Assisted Development · Claude, Claude Code, Cursor, Kimi, ChatGPT, GitHub Copilot, agentic workflows

Tools · Git, GitHub, Vercel, Figma, Agile, CI/CD, PayPal, ClickPay, Resend, S3 storage

PROFESSIONAL EXPERIENCE

Frontend Lead — INNO

Riyadh, Saudi Arabia · Hybrid · Full-time · Oct 2025 – Sep 2026 (1 yr)
Frontend Developer, Oct 2025 – Feb 2026 · Frontend Lead, Feb 2026 – Sep 2026

- Led a frontend team of 3 developers, setting code standards, review process and a shared component architecture across 15+ screens.
- Rebuilt the company's bilingual corporate site from scratch in Next.js 16, React 19 and Tailwind CSS v4, cutting runtime dependencies by 60% and fixing scroll-performance problems earlier teams could not.
- Authored a CSS-only design system with brand tokens, 22 custom animations and 7 illustrated SVG scenes with no animation library, and engineered right-to-left architecture end to end: Arabic as the default server render, CSS logical properties and bidirectional text isolation.

Frontend Developer — OnlyFounders, Founders Hub Network

Bangkok City, Thailand · Remote · Contract · Jun 2025 – Nov 2025 (6 mos)

- Built the frontend for a Web3 fundraising MVP, translating smart-contract events into reactive UI state with real-time on-chain data and multi-wallet connectivity.
- Architected the frontend in TypeScript, Tailwind CSS and Zustand, handling wallet switching, transaction signing and gas estimation without page reloads or state loss.

Freelance Full-Stack Developer

Saudi Arabia · Remote · 2024 – 2026 · concurrent with full-time roles

7 paid client builds including Etar, Alpha Factory and IEDAR. Full case studies at murhaf.site

- **Omdah** · Oct 2025 – Feb 2026 · Bilingual site and CMS for a video production studio, with a self-serve admin, presigned-URL video uploads and a Range-request proxy.
- **Snaya** · Dec 2025 – Feb 2026 · Arabic-first site for a talent agency, with the whole motion system hand-built and no animation library.

PROJECTS

Craftly — AI CV Generator

github.com/MorhafGhziel/ai-cv-generator · Next.js · TypeScript · Prisma · Neon PostgreSQL · Gemini · Groq · Zod

- Takes a CV as PDF plus any job posting and returns a tailored CV, drafted screening answers and a print-ready A4 PDF. Dual-provider LLM layer over Gemini and Groq with automatic failover, model-health detection, a shared latency budget that prevents serverless timeouts, and Zod-validated output with retry.

Archy — Natural Language to Database Schema

github.com/MorhafGhziel/devflow-ai · Next.js · TypeScript · Prisma · Neon PostgreSQL · Clerk · Gemini · Canvas

- Turns one sentence describing an app into a live interactive ER diagram, then generates the Prisma schema, TypeScript types and PostgreSQL DDL from the same graph. Calls Gemini over raw fetch with typed retryable errors, then repairs model output so it always compiles. Canvas hand-built, no diagramming library.

Lumen — Docs and Infinite Canvas Workspace

github.com/MorhafGhziel/lumen · Next.js · TypeScript · Supabase · PostgreSQL · Gemini · Canvas

- Block-based documents and an infinite canvas in one page tree, with an AI sidebar that reads the open page over a proxy with session checks, rate limits and streaming. Editor built on raw contentEditable with 17 block types.
